

A forum to find books in the Library

The Union Knows

- When a book that the Library system says is on the shelf is not there, there is then no way of finding it.
- This often because it is being or has been used by someone in the Library but has not been checked out.
- There is also no dedicated platform for students to contact each other about books they would like to use.

The Unions Believes

- It would be more efficient and practical for students to contact each other to find books that they need.

The Union Will

- Work with the University to create an online forum in which students can message each other to find out about the location of library books they require.

The Union Chooses
