

## Find a solution to the car parking issue across UWE

### The Union Knows

- Car parking is a big issue for a large amount of the Students that study at UWE.
- Only a limited amount of buses travel directly to the different campuses and students are spread out throughout the city.
- Due to the unreliability of buses in Bristol getting a direct bus can be extremely time consuming, having to get a connection worse still, making driving a more attractive option.
- There is inadequate parking spaces for the amount of people wishing to park at the different campuses.
- Unexpected travel times from late buses and finding parking spaces is one of the main reasons students arrive late to lectures and seminars.
- Parking especially effects students that commute from outside of Bristol especially those studying at Glenside as driving in is the only realistic option.

### The Unions Believes

- The University has not done nearly enough to find an adequate solution to a problem that has been negatively effecting students for years.
- Previous increases in the price of parking have not solved the issue at the expense of Students, the justification that it subsidises Wessex Star is no longer applicable.

### The Union Will

- Lobby the University to create a relaxation area.
- Suggest the repurposing of some of the space in the old Students' Union building.
- Find out what students would want form a relaxation area.
- To work with the University to minimise the cost of parking.
