

Microwaves and free hot water

The Union Knows

- With the rising costs of education and living many students are looking for ways to save money.
- There is a demand for better access to microwaves amongst the student population.
- Some students have specific dietary requirements and are often restricted to food they have made for themselves.
- There is currently little if any access to free hot water.

The Unions Believes

- That due to the financial constraints students face they should be able to make the choice between purchasing a hot meal and reheating their own food on campus.
- Paying for hot water is unjustified.
- Students with dietary requirements should be able to have a hot lunch if they want to.

The Union Will

- Find a suitable location/s where students who have brought in the own food can have access to a microwave and hot water dispenser.
- Lobby the University to provide these amenities..

The Union Chooses
